Six original etchings by Nissan Engel

**Printed by the atelier Mario Boni of Paris

NISSAN ENGEL, who was born in Israel, lives and works in Paris. He began his career as a figurative painter and in the theater as a set and costume designer. Nissan was influenced early on by a broad range of work from conceptual art to the abstractions and "Pop" styling of the mid 1960's. Shortly thereafter, he discovered a special affinity for collage after working on a series of stained glass windows in New York and Maryland. After living in New York for several years, Mr. Engel returned to Paris and continued his experimentation with collage, incorporating other media into his works. The result, which would become the underlying style of his mature career, was an individualistic blending of a variety of media, with music emerging as a predominant theme.

An artist of international renown, Nissan has had numerous important exhibitions throughout the world.

***"When musical work inspires a visual artist to create a work in his own art form, the result can be a revelation. That is the case with Nissan Engel's paintings."* Daniel Barenboim**
